

Azure DevOps 部署 & 项目上云迁移培训

学习分享网

Azure DevOps 部署&项目上云迁移 ----- 空环境搭建

The screenshot displays the Azure DevOps web interface. At the top, the browser address bar shows the URL `/DefaultCollection/`. The page header includes the Azure DevOps logo, a search bar with the text "搜索", and navigation icons. A left sidebar shows the current collection, "DefaultCollection". The main content area is titled "DefaultCollection" and features a "新建项目" (New Project) button. Below the title, there are tabs for "项目" (Projects), "我的工作项" (My Work Items), and "我的拉取请求" (My Pull Requests). A "筛选项目" (Filter Projects) dropdown is also visible. Two project cards are displayed: "NETCORE_TEST" (Frist Test Project) and "NetCore_Project1" (net core web app sample [Test1]). A large, diagonal watermark reading "学习分享 勿做商用" is overlaid on the page.

Azure DevOps 部署&项目上云迁移----- 代码管理

Azure DevOps interface showing the file management view for a repository named NetCore_Project1. The breadcrumb path is DefaultCollection / NetCore_Project1 / Repos / 文件 / NetCore_Project1. The current branch is master. The file explorer shows a directory structure with folders for Azure.KeyVault and Azure.KeyVault.WebApp, and files for .gitattributes, .gitignore, Azure.KeyVault.sln, LICENSE, and README.md. The file list table displays the commit history for these files.
